Dubilier unveils first full line catalogue

USB2.0 sockets, networking plugs/ sockets, high cap ceramics added to the range

Dunmow, UK, 2 July 2007. Dubilier has launched its 2007 catalogue, featuring 400 pages of quality, competitively priced passive, electromechanical and battery products. The volume includes Dubilier's first ranges of USB sockets, networking plugs/sockets and high capacitance ceramic chips, as well as massively expanded capacitor, resistor, battery and connector ranges.

Dubilier's new range of USB 2.0 sockets covers both type A and B, PCB mount formats. Both styles are offered in right angle and vertical form, with surface mount and through hole versions. Also new are the industry standard networking plugs/sockets, a quality range offered at highly competitive prices.

Dubilier is offering low profile side entry jacks, top entry jacks and standard plugs. A jack with an integrated LED is also offered together with associated hoods and a shielding can to add retrofit protection to unshielded products.

The catalogue also covers the significantly expanded range of Dubilier passive components. The SMT ceramic chip capacitor range now offers high capacitance ceramic chips available in X7R, X5R, Y5V and Z5U dielectric with a capacitance range of 0.15uF to 100uF. The range of SMT electrolytic, film capacitors, SMT tantalum capacitors and chip resistors have also been expanded.

New additions to the range of connector solutions extend the audio, board to board/wire, IDC and terminal block ranges whilst our battery offering increases with the introduction of a range of nickel metal hydride (NiMH) batteries available in AAA, AA, C, D and PP3 sizes.

About Dubilier

Dubilier is a leading supplier of high quality electromechanical and passive components, manufactured to ISO9002 standard. The company offers ex-stock availability of fans, connectors, batteries and fuse-holders, as well as crystals, resistors and capacitors in surface mount and through-hole form. For further information, see: www.dubilier.co.uk.

About Abacus Group plc

Abacus Group plc is one of the leading distributors of electronic components in Europe, with directly owned companies having locations in every major European electronics market.

Abacus Group companies are marketed in four groups:

Abacus Electronic Component Distribution (ECD) has a portfolio of 180 franchises within 12 trading operations providing technical distribution services through locally based sales offices.

The Specialist Distribution group covers businesses offering displays and communications expertise, and includes Trident, Axess and TDC.

Abacus Own Brand encompasses Dubilier, Eledis and Emcon Components offering competitively priced, quality passives, electro-mechanical components and batteries.

Alpha 3 Manufacturing provides electromechanical sub contract manufacture, under three trading operations: DEM Manufacturing, CTL Manufacturing and CCS Electronics.
